On 23 September 2024

Speakers:

Jasminder Singh Gulati
Co-Founder, NowFloats (Acquired by Reliance Jio). Founder, Digital Desh & Full Stack Capital

No. of Participants: 120

LinkedIn Post:

As this semester comes to a close, I want to take a moment to reflect on the incredible journey we've had together in the Managing Platform Businesses (MPB) and Managing Digital Transformation (MDT) courses for MBA2025 Batch of IBS Hyderabad Official.
Over the past few months, you have explored not just theories but real-world applications of digital transformation and platform models. In our concluding session today with Jasminder Singh Gulati, we learnt as how profound impact digital infrastructure can have on the future of Digital India – and you are at the forefront of driving this change.
I found the Fortnightly Digital Transformation Colloquium (DTC) platform as an invaluable opportunity for my students, bridging theory with real-world practice. It allowed them to directly apply classroom concepts to cutting-edge digital transformation challenges and industry insights.

I've seen each of you grow in understanding how data, AI, digital platforms, and business models can redefine industries. As you move forward, please remember:
Leverage platforms: Whether in business, technology, or entrepreneurship, platforms provide scalability and resilience.
Lead with empathy: Digital transformation isn't just about technology, it's about people. Always focus on creating value for users and stakeholders.
AND most importantly, Stay Consistent, Curious, Focussed and Adaptable: The digital landscape will continue to evolve, and so should you.

I am proud of your progress and excited to see how you will shape the yours and also the future of Digital Bharat.

Event Report:

In this session, Jasminder Singh Gulati, co-founder of NowFloats, delved into the transformative power of IndiaStack. He explained how this digital infrastructure is enabling seamless financial transactions, governance services, and healthcare access for billions. Gulati highlighted the role of UPI, Aadhaar, and e-KYC in revolutionizing how individuals and businesses interact digitally. He stressed the importance of Digital Public Infrastructure (DPI) in creating scalable, inclusive solutions for Bharat. Students gained deep insights into the potential of IndiaStack for building impactful, digital products and services across sectors.
